## UNITED STATES CONGRESS

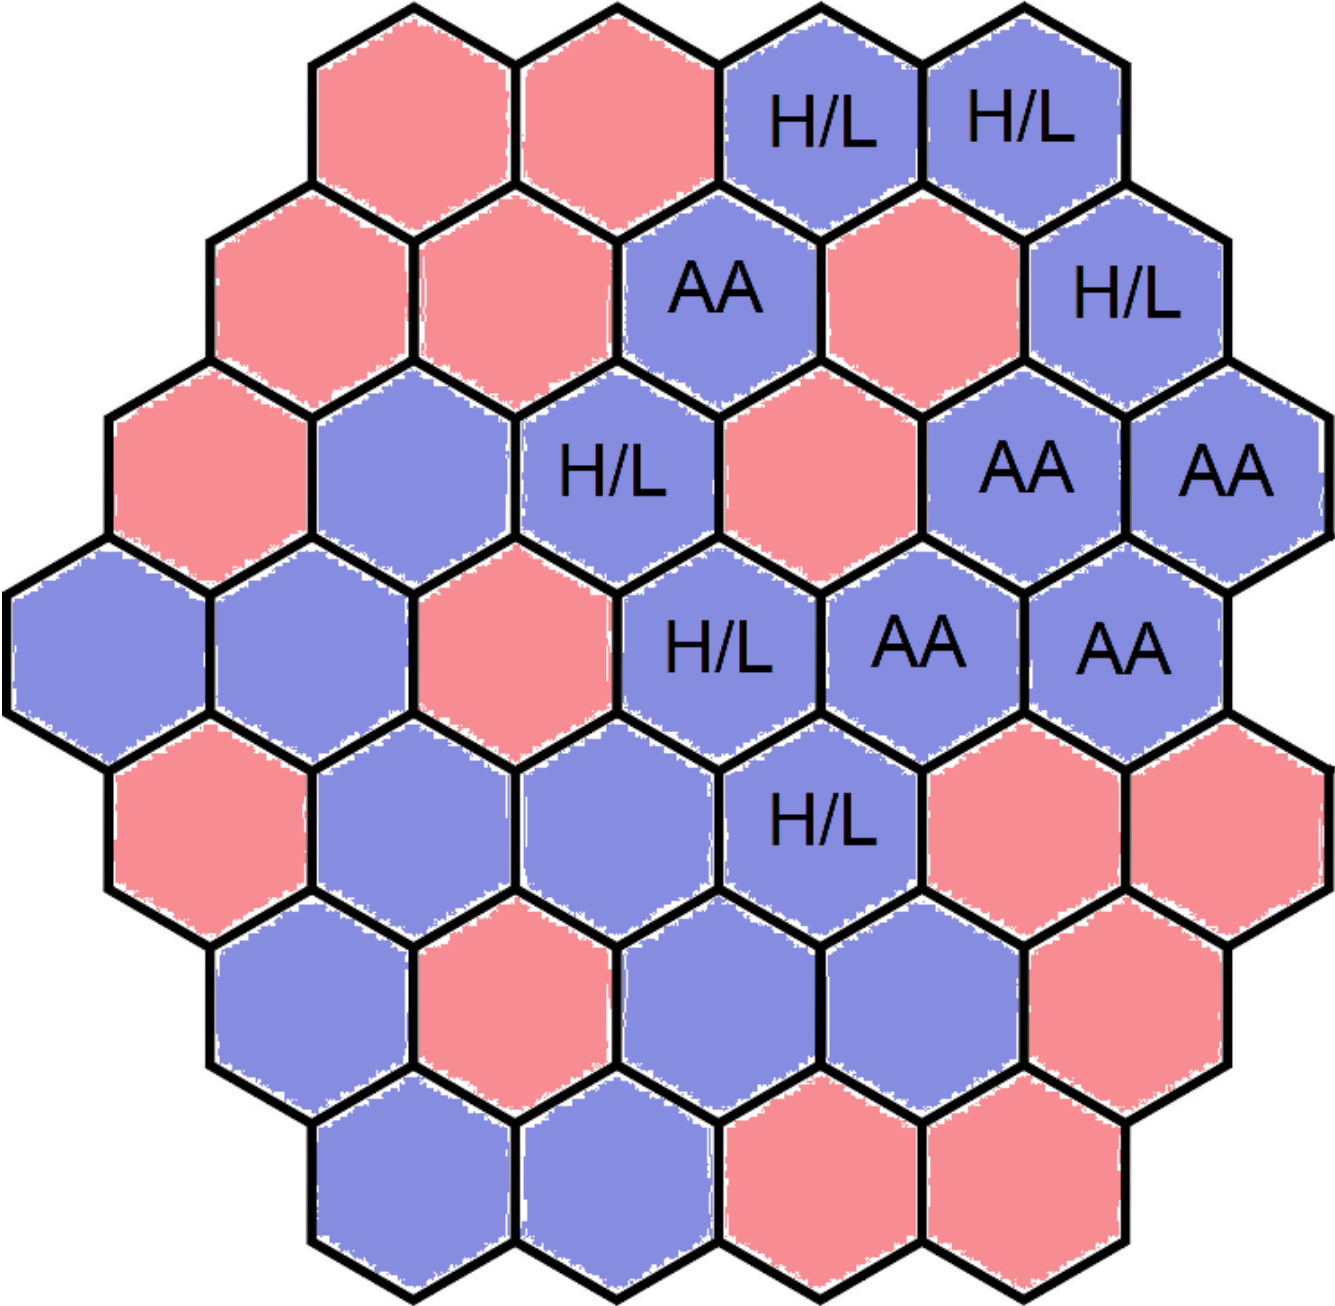

### CongressLab! Gerrymander Edition

See how well you can carry out each of the objectives in gerrymandering – drawing the lines to accomplish your redistricting goals. The only restrictions for this exercise: 1) contiguous districts (no islands), 2) equal population in each district.

**Racial Gerrymander:** Maximize the number of African-Americans in one majority-minority district AND the number of Hispanics/Latinos in another. What does this do for Republican in other districts?

**Incumbent Gerrymander:** Maximize the safety of districts for incumbents of both parties.

**Partisan Gerrymander:**

Maximize the number of Republican House seats.
